

Solutions Built for Your Success

Helping You Deliver Reliable Instruments—Faster, Easier, and with Less Risk

Your customers evaluate your instrument by its performance in real-world use. That performance depends on the quality and reliability of the consumables, the consistency of supply, and the expertise supporting it.

Restek partners with you to remove complexity—providing dependable consumables, technical insight, and responsive support so you can focus on building great instruments and growing your business.

Accelerate Time-to-Market

Bring your systems to market faster without increasing the internal burden:

- Expand your offering without adding manufacturing complexity.
- Launch with confidence in reproducible performance.
- Reduce validation and troubleshooting time.
- Lower total cost for you and your customers.

Let us handle the consumables work so your team can concentrate on the instrument.

Science That Supports Your Instrument

Your instrument operates inside real methods, real matrices, and real regulatory environments. We work alongside your team to:

- Optimize separations and method robustness.
- Match consumables to application conditions.
- Identify potential failure points *early*.

Reliable Supply You Can Count On

Consistency matters as much as performance:

- Best-In-Class manufacturing and inventory support.
- Forecasting and blanket order programs that ensure a stable supply chain.
- Custom configurations and labeling.
- Long-term product consistency.

Your customers get reliability.

You get predictability.

Confidence From Prototype to Production

Because we control our manufacturing processes—from raw materials to finished products—you receive consistent consumables that protect your instrument's reputation.

*Fewer issues. Easier validation.
Stable long-term performance.*

Why Restek

We support your instruments with a broad range of chromatography consumables designed for dependable performance in real applications—not just specifications.

Our portfolio supports gas and liquid chromatography systems as well as sampling, preparation, and reference material workflows, helping you deliver consistent results to your customers.

Our Specialties include:

- GC & LC columns
- Reference materials & standards
- Sample preparation solutions
- Air & gas sampling products
- Gas purification & system accessories
- Tubing, valves, and fluid path components
- Custom-configured columns and assemblies

Because your customers depend on system performance, every product is designed for repeatability, compatibility, and long-term reliability.

Easy and Flexible to Work With

Working together should reduce effort, not add to it.

Our employee-owners are empowered to respond quickly, communicate directly, and stay engaged as your needs evolve. From early development discussions to ongoing supply, we work alongside your teams to keep projects moving and minimize delays.

We will help you:

- Develop instrument-ready solutions
- Scale into production smoothly
- Resolve technical challenges
- Deliver products globally with confidence

The Restek Difference

At Restek, partnership means understanding the pressures you face—tight timelines, demanding customers, and the expectation that everything simply works.

Our people take the time to listen, ask questions, and stay involved until the solution fits your needs, not just a specification. When challenges come up, you have a team that responds quickly, communicates openly, and works alongside you to resolve them.

We aim to make working together easy, dependable, and comfortable—the kind of relationship where you know someone is looking out for your success as much as their own. With Restek you can focus on the instrument, and we'll take care of the rest.

Let's continue the conversation.
