

## Restek's Inert Column Technology is Now Available in Guards

Combined with selective stationary phases, Restek's new inert guard cartridges are the ideal choice in the analysis of metal-sensitive compounds. These new Raptor and Force guard cartridges provide optimal protection to your LC column and system while also reducing nonspecific binding of chelating analytes. Pair your inert guard with an inert LC column for increased response and optimum peak shape.

Features of Restek's new Inert guards:

- Premium inert coating reduces nonspecific binding of chelating analytes.
- Standalone design allows for use with any LC column.
- Complements the performance of Restek's inert columns for even better performance.
